Recommendation letter for Aditya Raj

Mr Aditya Raj has been working in my research group "Mobile and Enterprise Computing" since 2013. I first met him when he came to Germany as an exchange student for a three month internship. I set him the task to support us in a research project by creating and test simulation models on the Virtual Robotic Simulator (V-REP) using the LUA programming language. His uptake of new technologies and tools were very quick and I was impressed about the results he delivered in a short time. I was therefore happy to support him in coming back first for a six months project work on *Agent-based simulation of cooperative driving maneuvers of autonomous cars* during his Bachelor in late 2014, and then again in 2015 to study in the Information Technologies and Information Systems Master programme at TU Clausthal.
From 10/2015 until autumn 2016, Aditya was working as a research student in my group and helping us with prototype programming including the modelling of OpenStreetMap data using Blender, Osm2World and Osm2Filter, and the development of an developing OpenStreetMap Query Filter tool based on Apache MAVEN, including suitable XSD and XSLT transformations.
Also here, Aditya got used quickly to the technologies he worked with and mastered the steep learning curve well.
I have come to know Aditya as a very reliable, dedicated and hard-working person who is always looking to improve his skills and enhance his experiences. At the same time, he is a very polite and easy-going person that interacts very well with his fellow workers and superiors.
I am very sure that Aditya will be an asset for his future employer due to his devotedness and his intellectual capabilities- I do wish him all the best for his future career.

Yours sincerely

Prof. Dr. Jörg P. Müller
